Lakukan konfigurasi routing RIP pada Router Puma dan Tiger. Perhatikan proses update routing RIP pada Router Eagle ketika konfigurasi Router Puma dan Tiger dilakukan.

) Router Puma

```
Router>en
Router#conf term
Enter configuration commands, one per line. End with CNTL/Z.
Router(config)#router rip
Router(config-router)#network 172.21.0.0
Router(config-router)#
```

) Router Tiger

```
Router>en
Router#conf term
Enter configuration commands, one per line. End with CNTL/Z.
Router(config)#router rip
Router(config-router)#network 172.21.0.0
Router(config-router)#
```

Dari PC Leo lakukan trace ke PC Aries

```
C:\>tracert 172.21.20.2

Tracing route to 172.21.20.2 over a maximum of 30 hops:

  0  0 ms    0 ms    0 ms    172.21.10.10

  2  1 ms    4 ms    3 ms    172.21.20.2

Trace complete.
```

Buat hubungan antara Router Eagle dan Puma terputus dan perhatikan proses update routing RIP yang terjadi.

```
Router>en

Enter configuration commands, one per line. End with CNTL/Z.
Router(config)#int se2/0
Router(config-if)#shutdown

Router(config-if)#

### Kegiatan 3. IGRP (Internet Gateway Routing Protocol)

Pada mode configuration, konfigurasi routing RIP pada Router Eagle

```
Router>
Router>en
Router#conf term
Enter configuration commands, one per line. End with CNTL/Z.
Router(config)#router igrp 100
      ^
% Invalid input detected at '^' marker.

Router(config)#router igrp 100
      ^
% Invalid input detected at '^' marker.

Router(config)#router eigrp 100
Router(config-router)#network 172.21.0.0
Router(config-router)#
```

Lihat konfigurasi routing IGRP yang telah dibuat dengan perintah “**show running-config**” pada mode user. Perhatikan konfigurasi pada bagian “Router rip”

```
Router#
Router#show running-config
Building configuration...

Current configuration : 810 bytes
!

no service timestamps log datetime msec
no service timestamps debug datetime msec
no service password-encryption
!
hostname Router
!
!
!
!
!
!
!
!
ip cef
no ipv6 cef
!
!
--More--
```

Lihat proses transaksi routing IGRP pada Router Eagle dengan perintah “**debug ip igrp transactions**” pada mode user. Tunggu beberapa saat untuk melihat informasi transaksi routing IGRP yang terjadi.

**Catatan:** Hasil tampilan perintah “**debug ip igrp transactions**” memperlihatkan informasi update routing IGRP secara detail. Untuk melihat informasi update routing IGRP secara lebih ringkas digunakan perintah “**debug ip igrp events**” (dengan lebih dahulu menonaktifkan “**debug ip igrp transaction**” dengan perintah “**no debug ip igrp transactions**”)

Lakukan konfigurasi routing IGRP pada Router Puma dan Tiger. Perhatikan proses update routing IGRP pada Router Eagle (secara detail) ketika konfigurasi Router Puma dan Tiger dilakukan.
